Key Logger

Overview

The Key Logger is a Python-based tool that records keystrokes in real time. It is designed for monitoring and security auditing purposes.

Features

- Captures all keystrokes in real time
- Stores logged keys into a file
- Runs silently in the background
- Lightweight and easy to use

Requirements

- Python 3.x
- `pynput` library (`pip install pynput`)

Installation

1. Clone the repository or download the script.
2. Install the required dependencies:
   pip install pynput

Usage

Run the script with administrator privileges to log keystrokes:

python key_logger.py

Notes

- Ensure you have the necessary permissions to run the script.
- Use this tool responsibly and only on systems you have explicit permission to monitor.
